Policy Guidance: Planning for Air Quality (including Good Design and Air Quality Assessments)

Appendix 2 – Air Quality Management Areas

Air Quality Management Areas (AQMAs) have been declared in Newbury (West Berkshire), Thatcham (West Berkshire), Twyford (Wokingham) and Wokingham Centre (Wokingham), M4 (Wokingham), Bracknell (Bracknell Forest) and Crowthorne (Bracknell Forest). They have all been declared because levels of Nitrogen dioxide (NO₂) exceed the annual mean objective for NO₂ at relevant locations where people might be exposed for long time periods such as residential dwellings. In all cases the main source of the pollution is road traffic in the vicinity of the AQMAs

Details of the Air Quality Management Areas, including maps are on the web, <http://info.westberks.gov.uk/index.aspx?articleid=27513>

If you need any further information about the AQMAs, including the latest monitoring data, please contact the Partnership.

Please note there may be a charge for officers time involved in ongoing discussions, preparing for and attending meetings, and reviewing any documentation and reports.
