

As a separate project to the PPP Schools Engagement Project for engine idling. The My Journey Team has also been running a Wokingham Specific Air Quality Project since October 2020 with the aim of increasing walking, cycling and scooting to school and other behavioural changes to improve air quality in the Borough. **The project officer is currently looking for six new primary schools to work with from September 2023.** As part of the project we work with schools to deliver whole school active travel initiatives, assist the school to run active travel campaigns and provide educational resources.

If you are interested in becoming an Air Quality School in SEPTEMBER as well as running the PPP schools engagement engine idling project please contact the project officer at:

kathryn.horsepool@wokingham.gov.uk.
